Advanced Grading

Color Tone

Evaluates subtle undertones that can also be present in colorless-graded diamonds and affect the diamond's overall appearance.

Growth Lines

Assesses internal growth lines formed during crystal growth that can impact brilliance and transparency

Visual Performance

This proprietary VeraLume score is a weighted measure of the factors that define a diamond's beauty

Exceptional brilliance and balance, with precise facet patterning, refined color tone, and no visible growth lines.

Faceting Analysis

Facet Design

- Brightness
- Less Bright
- Light Leakage
- Contrast

ASET Image

Professional opinion of trained gemologists using GIA-referenced standards at the time of evaluation. Not an appraisal or valuation. Valid only for the identified diamond if unaltered
